## PROJECT ON

# Exploratory Data Analysis on ODI Batting Statistics

Presented by :  
Saurabh Shirole

## About me

- Name : Saurabh Kailas Shirole
- Education : Bachelor's in Computer Science
-  <http://www.linkedin.com/in/saurabh-shirole-19136a361>
-  <https://github.com/saurabhks001>

# Business Problem

Cricket analysts, and fans struggle to:

- We have thousands of matches and hundreds of players across countries.
- The data is huge, unorganized, and difficult to compare.

# Objective

To collect and analyze ODI batting data to:

- Find top-performing players and trends.
- Visualize stats for better understanding.

## Web scrapping process

Import the necessary libraries (BeautifulSoup, requests, regex)

URL =

"https://stats.Espncricinfo.Com/ci/engine/stats/index.Html?Class=2;template=results;type=batting"

## Univariate Numerical Analysis

### Matches Distribution of Players.

- Most players play 50-170 matches in their careers.
- The Data is right-skewed-many play fewer matches, only a few play very high matches.
- The median career length is about 100 matches.
- A small number of players are outliers with 300+ matches(Very long careers).

## Univariate Numerical Analysis

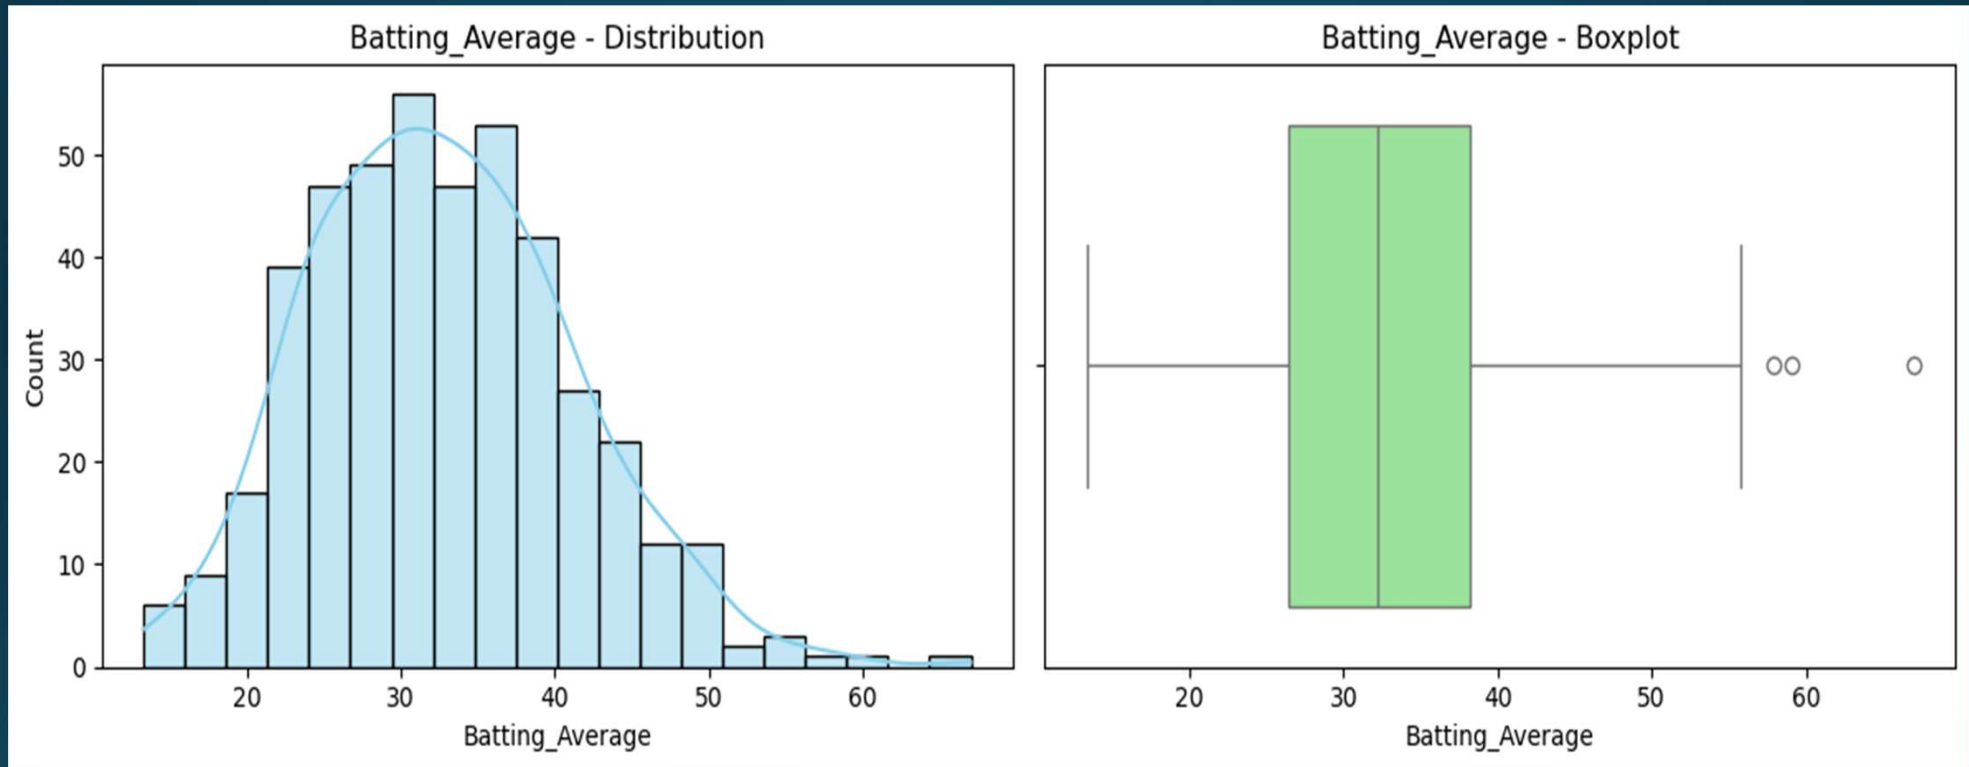

### Strike Rate Distribution of Matches.

- Most Players have strike rates around 70-90, while only a few exceptional players have very high strike rates(110+)

## Univariate Numerical Analysis

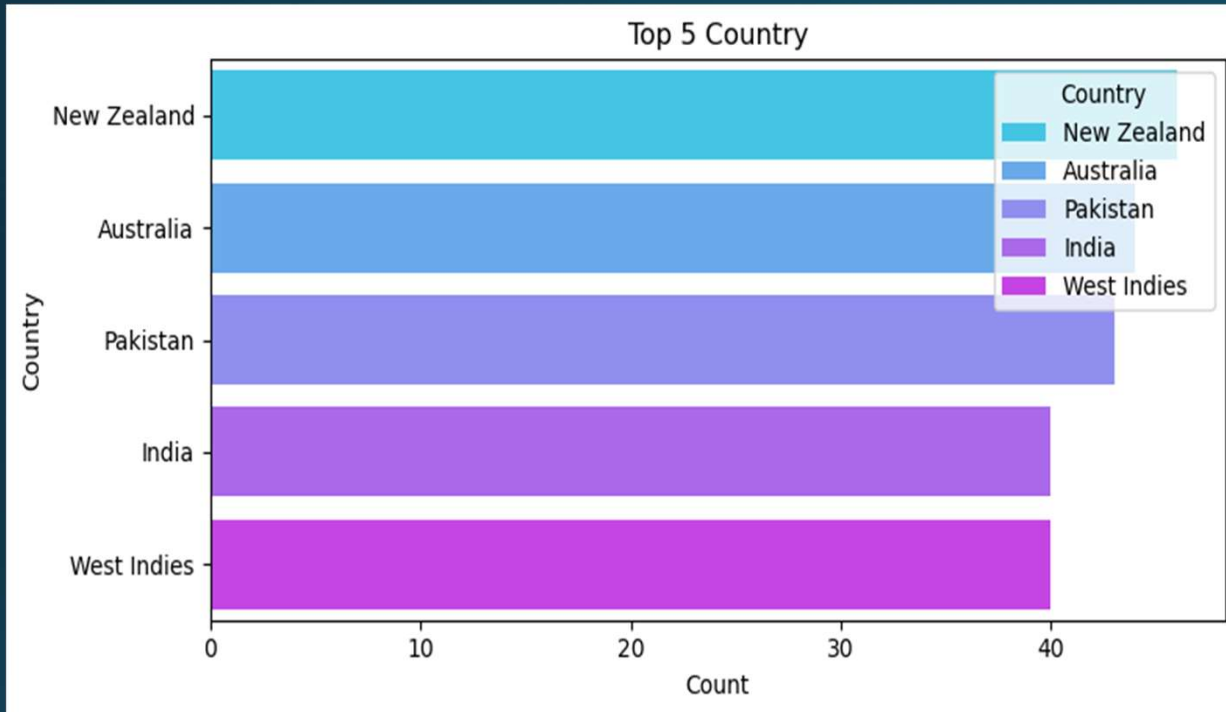

### Batting Average Distribution of Matches.

- Most players have a batting average between 25-40.
- The median batting average is around 30-32.
- A few outliers (60+) indicate exceptionally consistent player with very high averages.

## Univariate Categorical Analysis

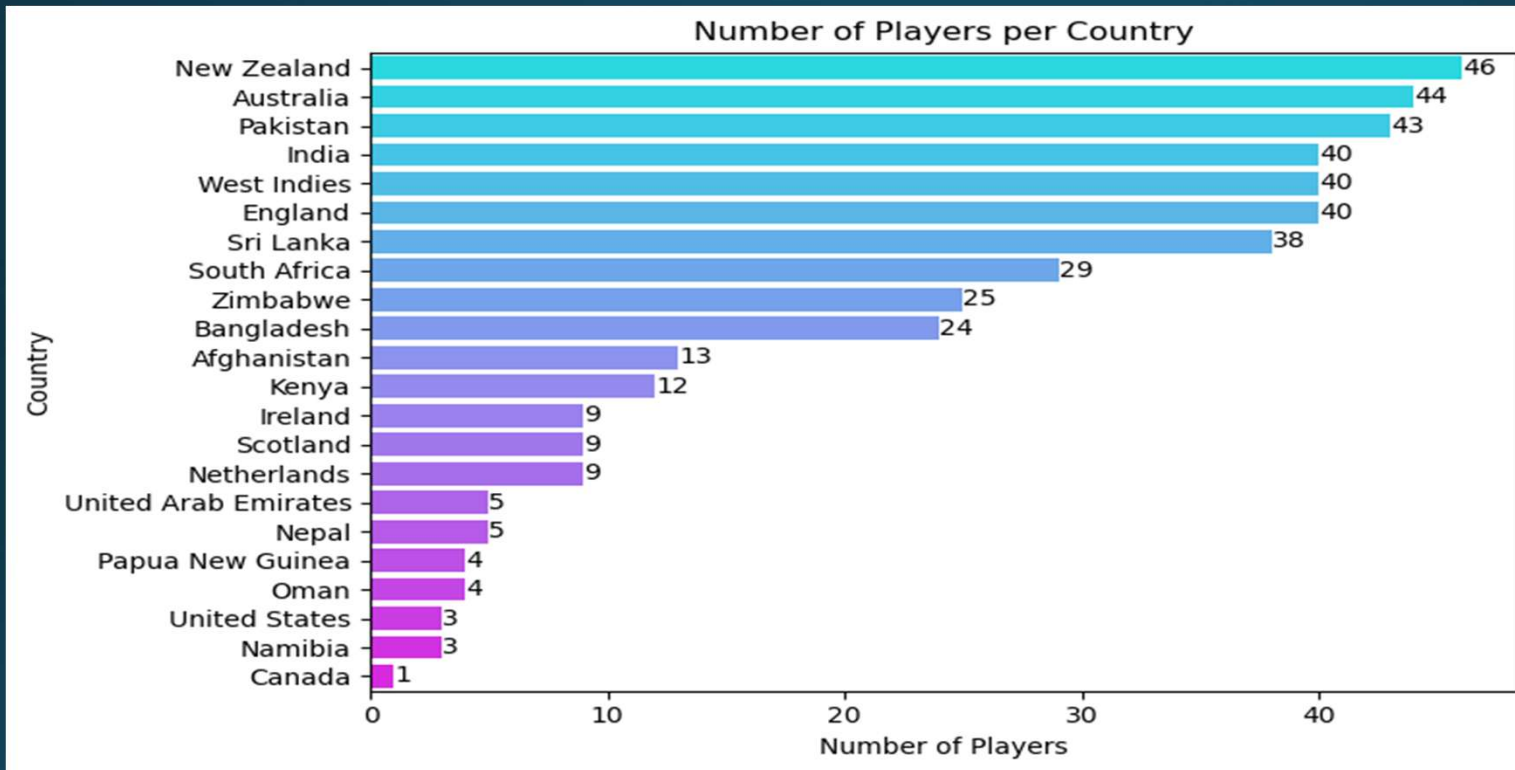

### Top 5 Countries in ODI Batting.

- New Zealand has the highest representation among the top 5 countries, showing strong player participation or dominance in this dataset.
- Australia and Pakistan are close contenders, with nearly equal counts, indicating balanced performance or presence.
- India and West Indies have slightly lower counts, but they are still significant enough to make the top 5, highlighting their consistent contributions

## Bivariate Analysis

### Number of Players per Country.

- Top cricketing nations: New Zealand, Australia, Pakistan, India, West Indies, and England each have 40+ players.
- Mid-tier nations: Sri Lanka and South Africa have moderate representation.
- Lower-tier nations: Zimbabwe, Bangladesh, Afghanistan, and others contribute fewer players.

## Bivariate Analysis

### Top 10 Run Scores.

- Sachin Tendulkar dominates with over 18,000 runs, far ahead of all other players, showing his unmatched consistency.
- Kumar Sangakkara and Virat Kohli follow closely behind, both with over 14,000 runs, proving their exceptional performance.
- The rest of the players (Ponting, Jayasuriya, Jayawardene, etc.) have impressive tallies between 11,000–13,000 runs, but there's a noticeable gap compared to the top scorer.

## Bivariate Analysis

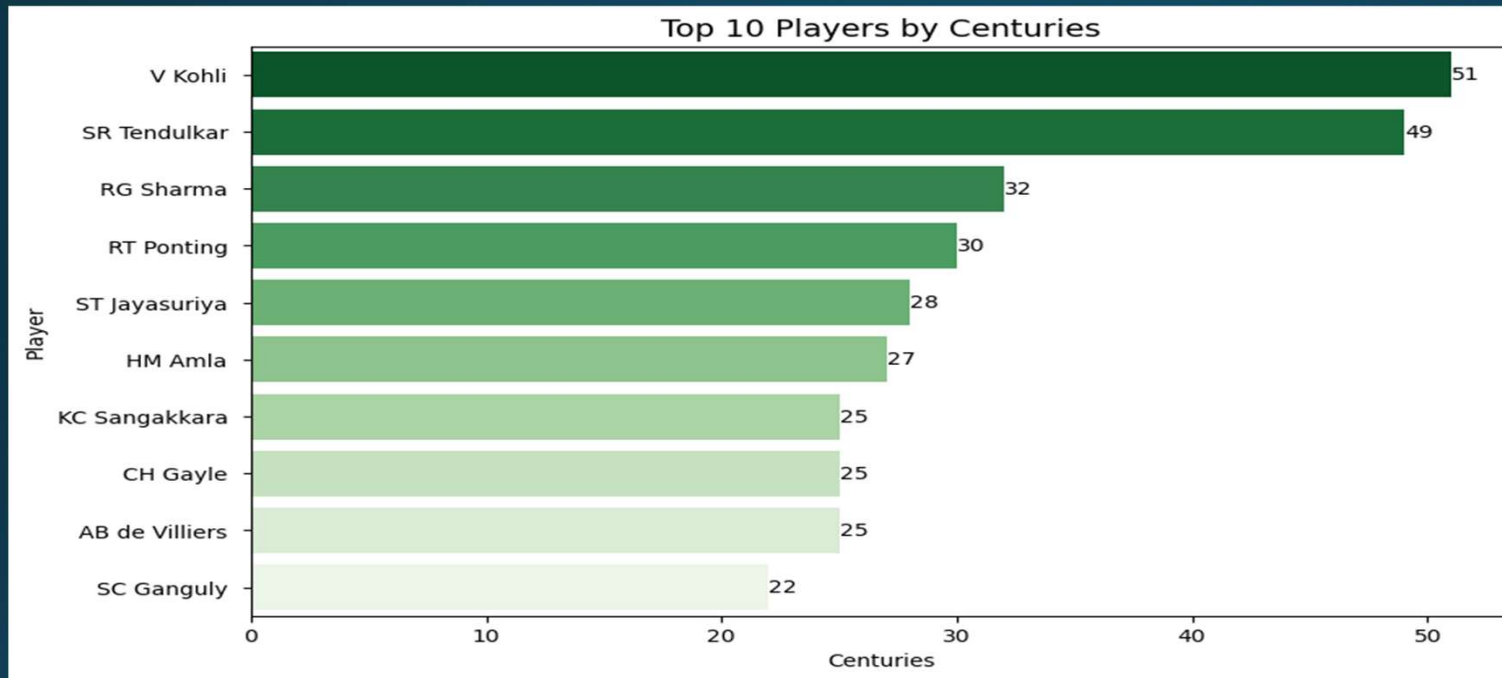

### Total Runs by Countries.

- India dominates with the highest total runs, showing strong batting depth over time.
- Sri Lanka, Australia, and Pakistan also have very high totals, forming the next strongest group.
- Smaller cricket nations like Nepal, Oman, and UAE have much lower totals, highlighting fewer matches or less experience.

## Bivariate Analysis

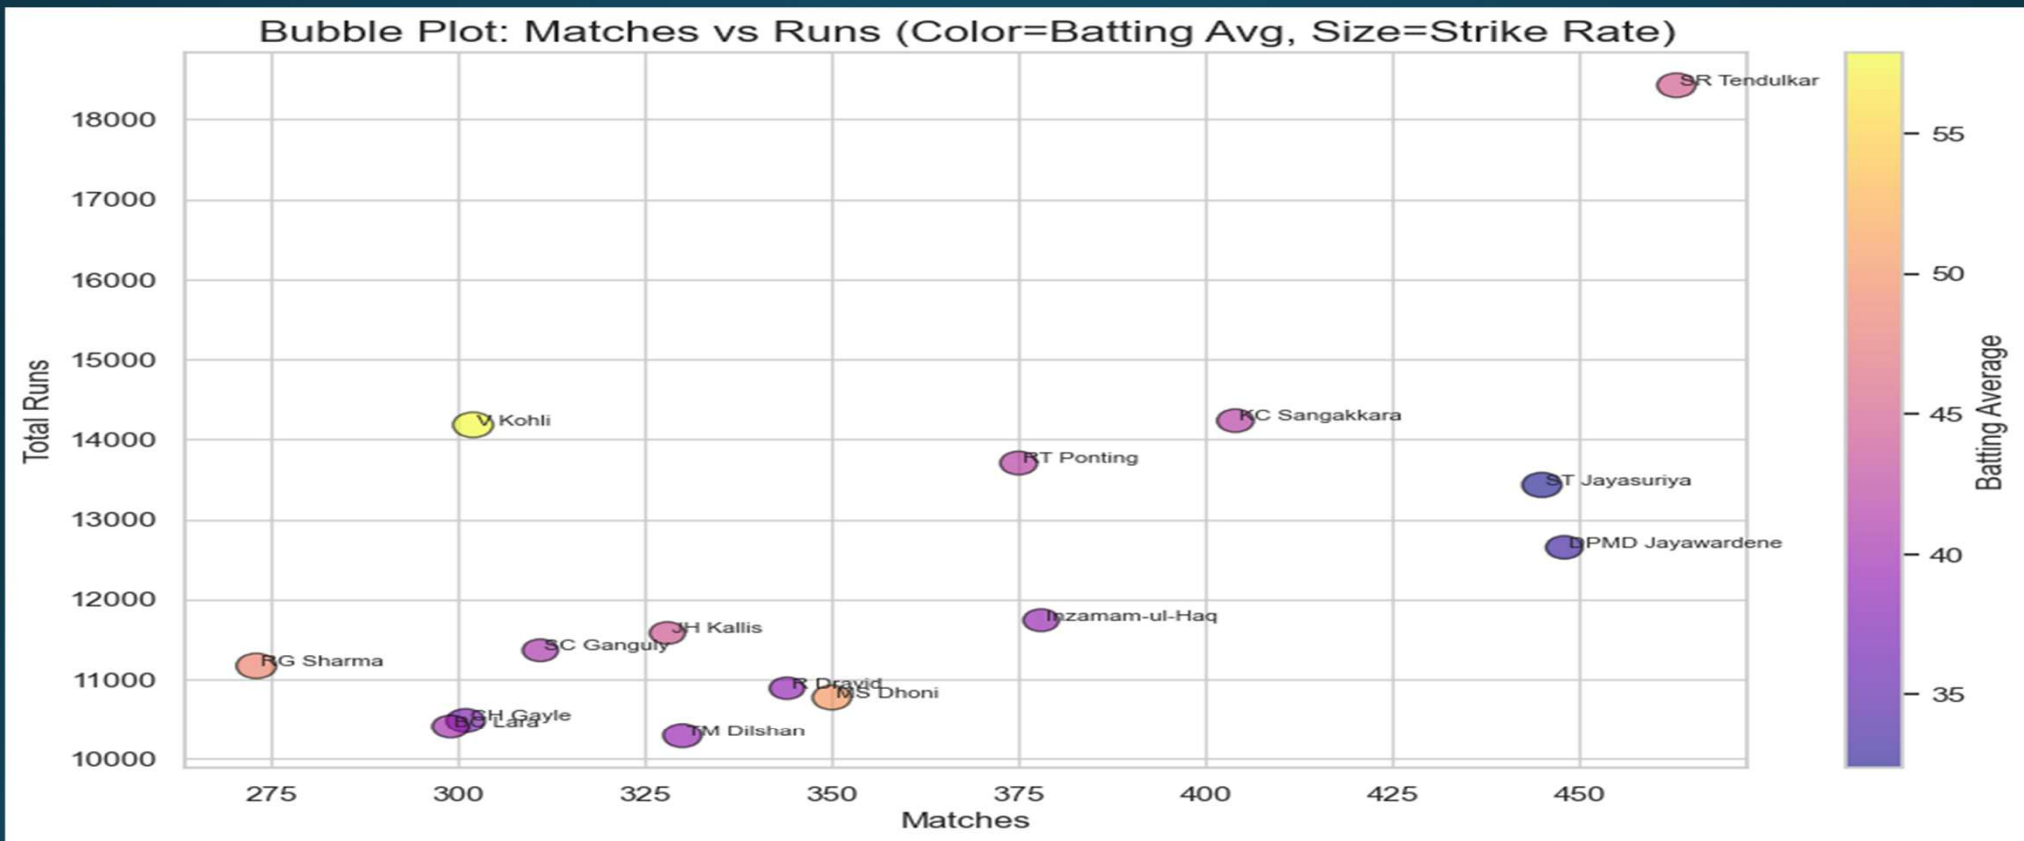

### Top 10 Players by Centuries.

- **Top Performers:** Virat Kohli and Sachin Tendulkar are clear leaders with 51 and 49 centuries, far ahead of others.
- **Mid-tier Group:** Players like Rohit Sharma, Ponting, and Jayasuriya are in the 30–28 century range, showing consistent performance.
- **Close Competition:** Several legends like Sangakkara, Gayle, and AB de Villiers are tied at 25 centuries, highlighting a competitive group.

## Multivariate Analysis

### Matches vs Runs Distribution :

- More matches = more runs – Players who played more matches generally scored more runs.
- Kohli has best average – Even with fewer matches, Virat Kohli has the highest batting average.
- Big hitters have high strike rates – Players like Criss Gayle and Rohit Sharma score faster.

## Key Insight

- Top Run-Scorer : Sachin Tendulkar(India) -> 18426, 49 centuries.
- Highest Strike Rate : Jos Buttler(England) -> SR~118, shows modern aggressive style.
- Most Centuries in ODIs : Virat Kohli (India) -> 51 centuries.
- Matches vs Runs : Kumar Sangakkara (Sri Lanka) -> Long career 400+ matches, 14000+ runs.
- Country Dominance : India, Australia, Sri Lanka consistency produce top ODI batters.

## Key Insights – Top 5 ODI Batting Legends

Player	Country	Runs	Avg	Strike Rate	100's	50's
Sachin Tendulkar	India	18426	44.8	86.2	49	96
Kumar Sangakkara	Sri Lanka	14234	41.9	78.9	25	93
Ricky Ponting	Australia	13704	42.0	80.4	30	82
Jayasuriya	Sri Lanka	13430	32.4	91.2	28	68
Virat Kohli	India	13848	58.7	93.6	50	70

## Conclusion

- I collect and cleaned ODI batting data using web scraping.
- EDA help me find important patterns in player performance.
- A few top players score most of the runs and centuries, while many stay in the mid-range.
- Strike rates are higher in the modern era, showing a more aggressive style.
- More matches usually mean more runs, but batting averages differ widely.
- This project shows how data helps compare players, find trends, and support cricket strategies.

A photograph of a cricket field at sunset. In the foreground, a wooden cricket bat with a red patch on the blade and a black handle lies on the grass. To its right, a red cricket ball with white stitching sits on the grass. In the middle ground, the three stumps of a wicket are visible. The background shows the curved stands of a large stadium, mostly empty, with two large floodlights on tall poles illuminated against a sky with soft, orange and yellow clouds.

**Thank You !**
